

Dear Compak SA Member and Sport Shooter

25 June 2020

Ministry of Sports, Arts and Culture – Post Covid-19 Request Submitted for the Re-Opening of Clay Target Sport Shooting

Compak SA submitted a formal request to the Ministry of Sport, Arts and Culture on Tuesday, 23 June 2020, to request formal approval for the re-opening of our sport. The Department Sport, Arts and Culture confirmed receipt of our proposal on 23 June 2020. Unfortunately, no dates or timeframes were provided for feedback.

Until Compak SA receive formal approval from the Department Sport, Arts and Culture for the re-opening of clubs, and for Clay Target Shooting to resume normal activities i.e. practise and competition shooting, we request that clubs remain closed and to refrain from any shooting activities, being leisure, practise or competition shooting.

We do understand that most, if not all clubs, are private businesses, and the sole income of the club owners, and are desperate to reopen to generate valuable income. The unfortunate reality though, is that clubs that do not adhere to the instructions of the Minister of Sport, Art and Culture, stand the chance of being closed down on a permanent basis by the ministry. We therefore urge clubs to be patient, however tough it might be.

From a shooter's perspective, we do understand everyone's frustrations, as we are all in the same situation. Note that it is a privilege to own a firearm and it should be in everyone's interest to protect those privileges at all cost. Please see DSAC Media Release extract - If any individual or club do not adhere to current rules and regulations, you are in direct violation of the Directions and Regulations, and punitive measures can be taken against Sport Federations such as Compak SA, which will directly have a negative impact on entire Compak Sporting community.

We will revert back to you as soon as we receive any feedback from the Department Sport, Arts and Culture.

We trust that this most frustrating situation will be resolved very soon and we all will return to the ranges to enjoy the sport we all so dearly love!

We trust you find this in order.

Derek Steyn

Media Statement

20 June 2020

MINISTER NATHI MTHETHWA ON THE IMPLEMENTATION OF THE LEVEL 3 SPORT DIRECTIONS

When declaring COVID-19 a pandemic, the World Health Organisation (WHO) implored the countries of the world to seek to “strike a balance between protecting health, minimising economic and social disruption, and respecting human rights.”

The COVID-19 Pandemic has caused significant disruption to the sporting sector.

Government had to consider whether particular sectors of the economy should be permitted to re-open and on what basis. These include the risk of transmission while considering the ease of implementing mitigation measures, the expected impact on the sector of continued lockdown and value of the sector to the economy.

On 11 June 2020, details of the Directions for Sport, Arts and Culture under the Disaster Management Act No. 57 of 2002 were gazetted. The published Directions focused primarily on sectoral implications in relation to the Government Level 3 Risk adjustment strategy to be employed in preventing and combating the spread of COVID- 19.

The Directions require that sports bodies must comply with the following before the resumption of either training or matches for contact and non – contact sport:

Sports bodies must apply in writing to Minister informing him on the date of the resumption of playing and training, included in their plan all compliance matters as outlined in the Directions.

Sports bodies in their plan submitted to Minister must take into account of the following: -

- The testing of athletes;
- Waiting period of the results;
- Cleaning and disinfection of the sporting venues;

- Appointment of compliance officer;
- Preparation of the register;
- Procurement of the screening equipment;
- Development of transportation plan;
- Procurement of sanitisers and mask;
- Planning around the issue of catering;
- Development of training methodology;
- Names and sporting venues to be utilised;
- Any alternative venue whereby the previous venues or area have been declared a hotspot; and
- Identification of isolation area;

Sports bodies are expected to submit their plan within 14 days after publication of the Directions.

Upon receipt of the plans as required by the Directions, the Minister must apply his mind as to whether the sports bodies have complied with all requirements as proclaimed in the Directions. During the period of processing the plan, no sports body is allowed to resume training or playing.

Furthermore, in processing the plans, the Minister may consult with the Department of Health, relative to compliance with health protocol including, amongst others, pronouncement of the hotspot area as to whether it is feasible to resume matches or training in such area, and the levels of risk thereto.

The Minister shall approve the application based on the recommendation of the appointed team and relevant sports body will be informed of the decision of the Minister in writing.

If the sports body resumes training or matches either contact or non-contact without the approval of the Minister, it is tantamount to a violation of the Direction and Regulations. Any necessary or punitive measure will be taken against such sports body in terms of the Regulations.

The Department shall deploy officials to monitor compliance with the Directions and such officials shall be given special identity document.

Currently, there are sport bodies which have sent their plans and are being considered by the Department, together with the NICD (National Institute of Communicable diseases, an institute of the Department of Health).

The Department sincerely appreciates the co-operation from sports bodies in fighting the spread of COVID 19 and we hope to work closely in ensuring that the sector is not responsible for increasing the spread of COVID -19.

YOUR LIFE IS IN YOUR HANDS.
